Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Renirie et al (6141590).

The methodology of the above claim is considered to follow obviously from the teachings of the Renirie device. See col. 5, lines 20-43, where it is taught that the difference between arterial pressure maximum and minimum is referred to as the stroke volume.

Allowable Subject Matter

3. Claims 1-24 are allowed.
